

ANKITA NANDAL

Software Development Engineer in Test

+91 7986862141 | ankitanandal2009@gmail.com | [LinkedIn](#)

Summary

SDET with 2+ years of experience in software quality assurance, specializing in **API testing**, **ETL validation**, **AI/LLM prompt testing**, **database testing**, and **payment gateway validation**. Experienced in validating AI-powered platforms including **RAG pipelines**, **MCP-based agents**, and **LLM response benchmarking** across **MongoDB**, **Neo4j**, and cloud environments. Skilled in test case design, backend verification, log analysis, and supporting reliable releases in Agile teams.

Technical Skills

Testing:	Manual, Regression, Functional, End-to-End, ETL Testing, Prompt Testing, Load Testing
Automation:	Playwright (Python)
Tools:	JIRA, TestRail, Postman, RainforestQA, Katalon, AppTester, TestFlight, JMeter, ArgoCD
API & DB:	REST API Testing, MySQL, MongoDB, Neo4j
Cloud & Monitoring:	AWS EC2, S3, Log Tracking & Analysis, OpenSearch, Elasticsearch, Airbyte
AI/ML Testing:	LLM Prompt Testing, RAG Pipeline Validation, MCP Agent Testing, AI Response Benchmarking
Platforms:	Web, Android, iOS
Payment Gateways:	Stripe, Nexio

Experience

SDET	<i>Fermi Development Private Limited, Gurgaon</i>	Feb 2026 – Present
- Validated backend APIs, ETL workflows, document ingestion pipelines, and AI-driven features on an AI-powered operations platform; verified data accuracy across MongoDB, Neo4j, and SQL-based systems. - Designed and executed comprehensive API test collections covering authentication, request/response validation, error handling, integration flows, and API-to-database consistency using Postman and MongoDB/SQL queries. - Conducted ETL and document processing QA including ingestion accuracy, field mapping, metadata validation, status tracking, and end-to-end data consistency across source and target systems. - Validated cross-service data sync and search workflows across Neo4j, Airbyte, OpenSearch, and Elasticsearch, including cron job behavior, indexing accuracy, search relevance, and data consistency checks. - Built an AI-based QA agent with MCP integrations to automate PR review test case generation and execution, reducing manual QA effort by 50% and improving PR validation turnaround. - Designed benchmark and evaluation workflows for LLM prompts, RAG pipelines, AI agent responses, and MCP-based tools, assessing retrieval accuracy, context relevance, hallucination risk, and edge-case handling. - Supported release validation through ArgoCD log analysis, AWS EC2/S3 environment checks, Python automation scripts, and Playwright-based test execution.		
QA Engineer	<i>Bridging Technologies, Mohali</i>	Sep 2024 – Feb 2026
- Tested an AI-based social media automation platform across LinkedIn, Instagram, and Twitter, ensuring cross-platform functionality and API standards compliance. - Validated AI content generation, scheduling logic, and NLP outputs against user requirements and platform-specific engagement goals. - Verified backend accuracy using REST APIs and phpMyAdmin, cross-checking UI inputs against live database records to isolate and debug defects. - Monitored real-time logs and tracked errors on AWS EC2 instances and validated S3 bucket integration for media storage workflows to maintain application stability. - Executed Stripe payment gateway testing for subscriptions and webhooks, simulating edge-case payment flows and validating real-time billing responses. - Tracked and prioritized defects in JIRA, collaborating with developers to resolve critical bugs and improve QA coverage. - Contributed QA insights during sprint planning, stand-ups, and exploratory testing sessions to identify coverage gaps early.		

Quality Analyst

Tiara IT Services, Zirakpur

Jan 2024 – Sep 2024

- Tested a cross-platform fitness and booking app across **web**, **Android**, and **iOS**, verifying functional and UI consistency across devices and OS versions.
- Designed structured test cases in **TestRail** and executed **regression** and **end-to-end testing** to validate product stability across release cycles.
- Tested **Nexio** payment gateway flows for one-time transactions, validating success/failure states and backend billing accuracy.
- Automated test flows using **RainforestQA** and **Katalon**, cutting manual effort and accelerating test cycle turnaround.
- Managed defect lifecycle in **JIRA** and contributed to **Agile** sprint reviews, planning sessions, and retrospectives.

Education

M.Sc. Biotechnology – Panjab University, Chandigarh

2021 – 2023

B.Sc. Biotechnology – Panjab University, Chandigarh

2018 – 2021
